Detailed Action

Claims 1-18 are pending in this Office Action.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-3, 10-13, 15-18, are drawn to a system for remote controlling a terminal device in class 709, subclass 217.

II. Claims 4-6 are drawn to a collaboration system with shared memory space, classified in class 709, subclass 212.

III. Claims 7-10 are drawn to a control server for a terminal device with a recording and replay module, classified in class 709, subclass 202.

The inventions are distinct, each from the other because of the following reason:

Invention Groups I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention in Group I has separate utility such remote controlling a terminal device. See MPEP § 806.05(c).

Invention in Group II has separate utility and is a collaboration system with more than one client. Invention in Group III has separate utility and is a control server for a terminal device with a module for recording and replaying operations.

Inventions in Group I, II, and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP §

Art Unit: 2155

808.01). In the instant case the different inventions are (1) remote control and (2) collaboration system and (3) recording and replaying operations.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and so on, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin R Bruckart whose telephone number is (703) 305-0324. The examiner can normally be reached on 8:00-5:30 PM with every other Friday off.
